DISCLAIMER

The AEMS Red Book is designed to be a resource document for use by Medical Direction Authorities responsible for the administrative, organizational and on-line medical direction of pre-hospital EMS personnel. It specifically recognized that variations from the guidelines contained within are not only acceptable, but also appropriate, depending on the individual circumstances of the involved areas and organizations.

By Statute and Rule, all advanced life support pre-hospital EMS personnel shall have administrative and online medical direction. These guidelines are not meant to act as a substitute, proxy or alternative to that medical direction. Any conflict between these guidelines and the individual EMS provider’s medical direction shall default to the Administrative or On-Line medical direction.

This manual sets forth guidelines deemed by AEMS to be within the acceptable standard of medical care. It is specifically recognized that there are acceptable variations from these procedures and protocols, which may also satisfy the standard of care. This manual does NOT define, limit, expand or otherwise purport to establish the legal standard of care.
This Matrix is to be utilized as a guideline for field triage of patients. It is NOT intended to be all-inclusive. It is understood that General Emergency Departments should be able to initially evaluate and stabilize patients with emergency medical conditions. At any time there is an EMS concern as to the appropriate destination for a patient, medical control should be contacted.

Pediatric Prepared Emergency Care Centers - Certified Hospitals

Per Arizona Chapter of American Academy of Pediatrics (www.azaap.org)

**Pediatric Prepared Advanced Care:** A facility with this certification provides services for all levels of pediatric medical emergency care. This hospital includes a pediatric intensive care unit and has a specific focus on pediatric services.

- Arizona Children's Center / MiHS / Maricopa Medical Center
- Banner Cardon's Children's Medical Center / Banner Desert Medical Center
- Banner Thunderbird Medical Center
- HonorHealth Scottsdale Shea Medical Center
- Phoenix Children's Hospital

**Pediatric Prepared Plus Care:** A facility with this certification provides services for most pediatric medical emergencies. The hospital has a focus on pediatrics, but ICU services for children are not available.

- Dignity Mercy Gilbert Medical Center
- HonorHealth Pediatric Emergency, Deer Valley Medical Center
- HonorHealth Scottsdale Osborn Medical Center
- HonorHealth Scottsdale Thompson Peak Medical Center

**Pediatric Prepared Care:** A facility with this certification provides services for pediatric care as part of a general Emergency Department. The hospital refers critically ill or injured children to other facilities and may or may not have pediatric inpatient services available.

Categorization Questionnaire

I. CATEGORIZATION INTRODUCTION (Revised October 2017)

Categorization is a voluntary process of assessing and categorizing the relative preparedness and capabilities of hospitals (or other healthcare facilities, such as satellite emergency centers), their emergency departments and their medical staffs to provide emergency medical care and associated health care services to patients with various types of medical and surgical emergencies. This concept was first proposed in 1966 by the National Academy of Sciences' National Research Council in its report, "Accidental Death and Disability: The Neglected Disease of Modern Society," as a mechanism for matching critically ill or injured patients with the appropriate health care facilities.

Hospitals and their emergency departments (EDs) are not equal in size, capability, or commitment. Categorization serves as a guideline to better understand facility capabilities and allow triage of patients to health care institutions with EDs fully capable of initial stabilization and treatment of emergent medical conditions. This is done through an objective and voluntary facility evaluation process. The end result of the process is the Categorization Matrix which is utilized as a guideline for the field triage of patients. The Categorization Matrix is NOT intended to be all-inclusive. It is understood that General Emergency Departments and Satellite Emergency Centers should be able to initially evaluate and stabilize patients with emergency medical conditions. At any time there is an EMS concern as to the appropriate destination for a given patient, on-line medical direction should be obtained.

A great deal of time and effort has been committed to the development of the Central Arizona Region’s Categorization Guidelines and Matrix. The resource information cited in this Categorization Matrix is compiled by AEMS with the assistance of hospitals and satellite emergency centers that self-categorize by voluntarily completing the Categorization Questionnaire. Additionally, AEMS relies on information, experience, expertise, and the source documents of various health organizations including, but not limited to: ADHS/BEMSTS, STAB, Arizona Stroke Initiative, Phoenix Stroke Center Workgroup, SHARE, American Burn Association, Arizona Perinatal Trust, and the Arizona Chapter of the American Academy of Pediatrics.

It is highly desirable that health care institutions that are successfully categorized through this process participate in AEMS via active membership, dues payment, committee involvement and annual participation in AEMS Odyssey conference planning.

On behalf of Arizona Emergency Medical Systems, Inc. (AEMS), we would like to thank those committee members who worked diligently to ensure the guidelines most appropriately reflected the needs of the Central Arizona Region. Lastly, a special thanks to all the hospitals and satellite emergency centers that participate in this voluntary process. Your participation enhances emergency medical care for the Central Arizona Region.

Sincerely;

AEMS BOARD OF GOVERNORS
II. INSTRUCTIONS, REFERENCE KEY, AND DISCLAIMER

1. Categorization Questionnaire Instructions
   Please provide all information requested. All questions with an * (asterisk) must be completed before the Categorization Checklist may be submitted. NOTE: There are a total of six pages - click on the button marked "next" to advance through the checklist; however, each page must be completed in order to advance to the next page.

   After you complete the sixth page, please click "submit".

   If you should have any problems completing this checklist, please contact Peggy Baker at pbaker@aems.org OR 623-847-4100

   Thank you for your anticipated cooperation and participation.

2. Reference Key
   Throughout this questionnaire, you may need to refer to the below Reference Key – which, when needed, will also be provided at the bottom of each page of any questions that may require your use of the Reference Key.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

3. Disclaimer
   This Matrix is to be utilized as a guideline for field triage of patients. It is NOT intended to be all-inclusive. It is understood that General Emergency Departments and Satellite Emergency Centers should be able to initially evaluate and stabilize patients with emergency medical conditions. At any time there is an EMS concern as to the appropriate destination for a patient, on-line medical direction should be obtained.
III. DEMOGRAPHIC INFORMATION

1. Facility Name:

2. Basic Information (check all that apply):

- General Hospital Based Emergency Department
- State of Arizona Level I Adult Trauma Center
- State of Arizona Level III Adult Trauma Center
- State of Arizona Level I or II Pediatric Trauma Center
- Pediatric Specialty Care Facility with PICU
- Pediatric Prepared Emergency Care Centers (indicated which level):
  - Prepared Care
  - Prepared Plus Care
  - Prepared Advance Care
- Perinatal Center
- Burn Center
- Toxicology Specialty Center
- Certified Stroke Center
- Cardiac Arrest Receiving Center or Referral Center through the State of Arizona
- Other (please specify)

3. Date Checklist Completed:

4. Name of Person(s) Completing Checklist:

5. Contact Information:
IV. CATEGORIZATION CRITERIA: GENERAL HOSPITAL BASED EMERGENCY DEPARTMENTS

1. Are all the members of your medical staff who are primary health care providers in your ED credentialed by your facility?

☐ Yes  ☐ No

2. Are all the members of your medical staff who could potentially respond to ED credentialed by your facility?

☐ Yes  ☐ No

3. Your Hospital has a policy whereby all ill or injured individuals who seek emergency care are assessed by qualified individuals and as indicated are either definitively treated in the facility or stabilized according to capabilities and expeditiously transferred to a higher level of medical or trauma care.

☐ Yes  ☐ No

4. Additional Comments:
V. MEDICAL STAFF ORGANIZATION / ADMINISTRATION

(Use the Reference Key at bottom of this page to assist with completion of the following questions.)

1. Medical Staff Organization with Specialties Consisting Of:
